## CAREER PROFILE

---

I am a passionate and dedicated Python and Django developer with a strong background in web development and a keen interest in building scalable, secure, and user-friendly applications. My journey into Django development began with a deep curiosity about how robust web applications are constructed and a desire to master the backend technologies that power them. I have honed my skills in Python and Django, leading to successful personal projects that involve complex authentication systems, custom user models, and seamless integration of views with templates.
