

WALTER KIBET

PYTHON, DJANGO DEVELOPER

GitHub: <https://github.com/Walterkibet04/>

Portfolio: <https://walterkibetportfolio.onrender.com/>

About Me

I'm a passionate and dedicated Python and Django developer with a strong background in web development and a keen interest in building scalable, secure, and user-friendly applications. My journey into Django development began with a deep curiosity about how robust web applications are constructed and a desire to master the backend technologies that power them. I have honed my skills in Python and Django, leading to successful personal projects that involve complex authentication systems, custom user models, and seamless integration of views with templates.
